DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 5-7, 10-12, 15-17, 20-22, 26-28, 31, and 32 are rejected under 35 U.S.C. 102(b) as being anticipated by Schroth et al. Schroth teaches the claimed invention including an outer bush 206, a ram/rod 106, an inner bush 109, and an anti-friction bearing 112 with ball bearings 185 (Figs. 3 and 10).

2. Claims 1-3, 8, 9, 11, 12, 13, 18-24, and 29-32 are rejected under 35 U.S.C. 102(b) as being anticipated by Andersson. Andersson teaches as shown in Fig.1 an outer bush 9, a ram/rod generally at 8, an inner bush 7, and an anti-friction bearing 20, roller members. Regarding claims 3,13, and 24 the ribs 10 located on both ends of the outer bush 9 are considered to be the annular shoulder. Regarding claims 8, 18, and 29 the member 5 is considered to be a ram plate. Regarding claims 9,19, and 30, it is inherent that the rod of the piston means 8 is releasable from the piston. Regarding claims 22-32, the member 2 is considered to be tie rods.

3. Claims 4, 14, and 25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David B. JONES whose telephone number is (571) 272-4518.
